

P3 PowerPorts™ Capacity Information Note

The number of LED video fixtures that can be driven by a single output of a P3 PowerPort is subject to the following limits:

	P3 PowerPort 1500	P3 PowerPort 1000 IP
Pixels per output	1024	1024
Power per output	48 V, 7.5 A	48 V, 5.0 A
Fixtures per output	63	63

This means that the following numbers of products can be driven by one single output of a P3 PowerPort:

Product	P3 PowerPort 1500	P3 PowerPort 1000 IP	Tripix Power IP66
