

viper nt

DMX-FOG GENERATOR

Digital technology and a new design

Manufactured for
Look – SOLUTIONS MADE IN GERMANY

powerful output

compact

made in Germany

The **Viper nt** unites the current digital technology with proven technik and power.

New features guarantee a much more simple operation – place and fog, reducing the amount of time needed to set up the machine.

Features

- Control panel

The control panel with LED-display, simple symbols allow for easy operation. It also protects the control buttons against dirt.

- Finest adjustments of the output

Digital technology makes fine adjustment of the pump possible. In steps of 1% the output can be adjusted from 0 - 99%. Thus, any desired effect from a tiny fog-cloud to the thickest fog can be produced. This enables the **Viper nt** to be used in both small and large locations.

- DMX 512 as standard

The **Viper nt** can be controlled via *DMX 512*. The connection is done with 5pin-XLR-plugs. The DMX start address can be adjusted and saved via the control panel.

The machine can also be controlled with *analog (0 - 10 V)* via a lighting desk or via XLR-remote (option). This connection is done with 3pin-XLR-plugs.

A *stand-alone-mode* is also possible. The adjustments are done directly at the machine. A short press at the start button makes the machine run. Therefore a permanent pressing of the start button is unnecessary.

- Internal timer

With the internal timer the fog time can be exactly adjusted in seconds, the wait time in minutes and the output in %.

Fluid

The following Look-fog fluids are available for the **Viper nt**:

- Quick-Fog (thick, quick disappearing fluid)
- Regular-Fog (thick, long lasting fluid)
- Slow-Fog (thick, extremely long lasting fluid)

Technical data

Procedure	vaporizing fog generator
Power requirement	1300 Watt
Voltage	230V/50Hz or 120V/60Hz
Warm up time	approx. 7 min.
Fluid consumption at max. output at continuous output	120 ml/min. 35 ml/min.
Fluid tank capacity	5 liter
Fog output	adjustable in 99 steps
Output projection	max. 15 m
Fogging time at < 50% output	continuous output
Control	DMX 512 0 - 10 V analog Stand-alone-Mode Radio remote (option)
Temperature control	Microprocessor controlled
Overheating protection	Heater block/Thermostat Pump/Thermal switch
Dimensions (L x W x H)	47 x 23 x 24 cm
Weight without bottle	approx. 8.6 kg

Dimensions

Advantages

- DMX as standard, analog and stand-alone-Mode
- Internal timer
- Easy handling
- Powerful output
- Fogging output adjustable in steps of 1% from 0 - 99%
- Continuous output
- Easy bottle changing with quick-out connectors
- Made in Germany

Accessories

- Hanging set (Hanging yoke complete with collection tray)
- Ducting adaptor
- XLR-remote
- Radio remote
- Case

Service

Based on the strong partnership with the German manufacturer OTTEC Technology GmbH, Look Solutions is able to provide a quick and easy service which guarantees the high quality of all products with the motto „innovation by communication“.
